

RTS28 disclosure: Top 5 Execution Venue reporting for 2020

In accordance with the Markets in Financial Instruments Directive II (“MiFID II”), Whitley Asset Management (WAM) is required to disclose the quality of its execution practices under its Best Execution Policy, and to identify the top 5 execution venues in terms of trading volumes (value of trades) and number of trades per class of Financial Instrument on an annual basis.

Of the instruments in scope there are three types:

- Equities;
- Debt Instruments; and
- Exchange Traded Products.

Top 5 Execution Venues reports will display the:

- Class of Financial Instrument;
- Execution venue name;
- Information on the total volume (value of trades);
- Number of trades as a percentage of all client orders executed;
- Confirmation of whether we have executed an average of less than one trade per business day in the previous year;
- Percentage of Passive and Aggressive Orders; and
- Percentage of Directed Orders.

Whitley Asset Management provides portfolio advisory and management services to retail clients. WAM places all orders with approved counterparties or the clients’ custodian broker, and are thus considered Passive orders adding to liquidity in the market; WAM does not place orders directly with trading venues and does not accept instructions from clients to direct orders to a trading venue and does not therefore undertake Directed or Aggressive orders.

Whitley Asset Management considers the following Execution Factors when executing trades:

- Price;
- Costs payable by the client as a result of the execution;
- Speed of execution and settlement;
- Likelihood of execution and settlement;
- Size of transaction;
- Nature of the transaction; and
- Market impact.
